

## Flow Diagram

Jerohm Mes | March 22, 2022

## Task 1

Create your own Flow Diagram, a subject of your own choice,

Example: Fast food order and convert it into code.

(Home Learning Task 2 e.g. Write a program that allows user to enter their favourite starter, main course dessert and drink.

Concatenate these and output a message which says—"Your favourite meal is.....with a glass of....")

### #Task 1

```
user_input = input("What is your name? ")
name = user_input
print("Hello", name + "!", "what is your favourite starter, main course, dessert and drink.")

user_input_starter = input("")
user_input_main_course = input("")
user_input_dessert = input("")
user_input_drink = input("")

starter = user_input_starter
main = user_input_main_course
dessert = user_input_dessert
drink = user_input_drink
print("Your favourite meal is", starter + " for starter,", main + " for main, and", dessert + " for dessert", "..... with a glass of", drink + "!!")
```
